### List of Competencies for On-the-Job Training (OJT) Work-Study Diploma in Electrical Engineering

Note: LOC is subject to changes due to curriculum review/ development

S/N	List of Competencies (Standard)	Company to indicate '√' for OJT competencies it can provide
1	Install electrical circuits	
2	Troubleshoot electrical faults	
3	Install sensors and actuators	
4	Install programmable logic controller	
5	Perform electrical design	
6	Perform electrical installation	
7	Maintain electrical installation	
8	Produce electrical layout	
9	Produce single-line diagram	
10	Inspect electrical quantities	
11	Manage electrical loading	
12	Maintain power electronics	
13	Maintain energy storage system	
14	Design motor and control system	
15	Install motor and control system	
16	Maintain motor and control system	
17	Design electrical distribution system	
18	Install electrical distribution system	
19	Maintain electrical distribution system	
20	Analyze power distribution	
21	Manage power quality	
22	Design solar photovoltaic system	
23	Install solar photovoltaic system	
24	Maintain solar photovoltaic system	
25	Maintain electric vehicle charger	
	Sub-total of Competencies (Standard)

#### **Course Objective**

This course equips trainees with the skills, knowledge and professional attributes to design, install, maintain, repair, inspect, test, operate and supervise electrical installations and systems in accordance with engineering specifications as well as codes of practice and regulations.

#### **Module Synopsis**

#### **Module 1: Electrotechnology**

On completion of the module, trainees should be able to analyse, connect, test and troubleshoot DC, AC and electromagnetic circuits.

#### **Module 2: Industrial Control Automation**

On completion of the module, trainees should be able to design and install programmable logic control system.

#### Module 3: Electrical Design & Installation

On completion of the module, trainees should be able to design, install, test and maintain electrical installations in compliance with the relevant codes of practice and statutory regulations.

#### **Module 4: Electrical Drafting**

On completion of the module, trainees should be able to produce electrical layout drawing and single-line diagram.

#### **Module 5: Circuit Analysis**

On completion of the module, trainees should be able to determine electrical quantities as well as apply concepts and theorems in circuit analysis for three-phase systems and manage electrical loading.

#### **Module 6: Power Electronics**

On completion of the module, trainees should be able to maintain power electronics and energy storage systems.

#### **Module 7: Electrical Motor & Control System**

On completion of the module, trainees should be able to design, install and maintain electrical motor and control systems.

#### **Module 8: Power Distribution System**

On completion of the module, trainees should be able to design, install and maintain major electrical equipment and its associated protective devices in the power distribution system, in compliance with the relevant codes of practices and statutory regulations.

#### **Module 9: Power System Analysis**

On completion of the module, trainees should be able to analyse power distribution and mitigate power quality issues.

#### Module 10: Solar Photovoltaic System & Electric Vehicle Charger

On completion of the module, trainees should be able to design, install and maintain solar

photovoltaic system as well as maintain electric vehicle charging infrastructures.

#### **Module 11: Company Project**

On completion of the module, trainees should have applied their acquired competencies in an authentic project that would value-add to the company.

#### **Module 12: On-the-Job Training**

On completion of the module, trainees should be able to apply the skills and knowledge acquired at ITE College and workplace to take on the full job scope, including supervisory function, where appropriate, at the company.

## WSDip in Electrical Engineering

### Off-the-Job Modules List

#### 1st Year Modules

- 1. Electrotechnology
- 2. Industrial Control Automation
- 3. Electrical Design & Installation
- 4. Electrical Drafting

#### 2<sup>nd</sup> Year Modules

- 5. Circuit Analysis
- 6. Power Electronics
- 7. Electrical Motor & Control System
- 8. Power Distribution System

#### 3<sup>rd</sup> Year Modules

- 9. Power System Analysis
- 10. Solar Photovoltaic System & Electric Vehicle Charger
- 11. Company Project
